SOCIETY**

LAS SCHOOLS' Challenge

The Schools' Challenge is an annual, project-based competition that culminates in presenting at the Lincolnshire Show in June, alongside other schools, competing for the prestigious Schools' Challenge champion award.

Enjoy a chance to enrich the whole curriculum. Allowing students to take ownership and get creative, submerging themselves in some healthy competition, while learning vital skills along the way.

Why not select one of our 'quick lightning' challenges to get innovative and imaginative in the last term!

While showcasing their work, students can celebrate their successes of the year by enjoying all the Lincolnshire Show has to offer.

With ten challenges to choose from based around; food, farming, the local community, the environment, and sustainability, we recommend these 'quick lightning' challenges:

- Roots and Hooves
- The Power of Water
- Farming Then, Now & the Future
- Gen Z-ero Climate Leaders of the Future

SKILLS AND OPPORTUNITIES

- Presentation skills
- Communication & teamwork skills
- Research / data interpretation
- Resilience
- Persuasive writing
- Creativity
- Industry connections
- Whole curriculum enrichment

"The Schools' Challenge is an excellent way to engage year 6 pupils after the intensity of SATs and the Show is a highlight of our year! The variety of challenges means there's always something to fit your setting and time available."

Teacher, Manor Leas Junior Academy
